

How To Stay Safe Online!

You can be hacked on snapchat Instagram and twitter .

You should be careful when you are playing games. As you may be so focussed in the game that there may be someone who is online asking you questions and you will be so focussed in the game that you will give away lots of person information.

By sharing you personal information you can have your accounts hacked and your parents bank accounts.

You should always think before you post something on social media for example snapchat like if you post something then it is then owned by snapchat.

If someone ever asks you for your address never give them it.
